

## BUSINESS PLAN SAMPLE 1

### What is a Business Plan?

A business plan helps you to determine if your business is likely to be viable, and focuses your efforts to improve your chances of success. As you prepare your plan you will get the answers to key questions such as:

- Is my business viable?
- What are the strengths and weaknesses of my business?
- Who are my customers and how do I plan to get them to buy from me?
- Who are my competitors?
- What skills will I need to properly run this business?

**Business plans are for YOU!** They are very effective in making your business more successful and reduce the chances of failure. Developing a business plan will help you think out how you intend to reach your goals. Your business will have more focus and direction simply by having a plan. Business planning will help you assess your business idea and work out problems before they occur. That is why banks, investors, and lenders like Community Futures require them.

### How do I use this Business Plan package?

Do not be dismayed by the size of this package. It may seem large, but it is designed to guide you through the creation of your business plan by turning it into a series of bite-sized pieces.

Each section has several parts. Each part contains a list of questions and examples. Your business plan is made up of the answers to those questions. This business plan package has fill-in-the-blanks pages for each section.

You may be asking where do I get the answers to the questions? The answer is market research. The answers to the questions are not just guesses; they must be supported by facts. Remember that information gathered for the Visioning section of the plan will be turned into numbers in the Financial section of the plan. The Projected Cash Flow is your vision turned into numbers.

You do not have to use the fill-in-the-blanks format; you are free to use any format you wish. However, be sure that your plan covers the areas outlined in this package.

## Table of Contents

Section 1 -	Executive Summary	2
Section 2 -	Vision	3
	Business Background	
	Your Products or Services	
	Your Customers	
	The Industry	
	The Competition	
	The Marketing Plan	
	The Management Team	
	Business Structure	
	Operating Plan	
	Not-So Minor Details	
Section 3 -	Financial Projections	19
	Start-Up Costs & Capital (Fund Use & Source)	
	Personal Requirements	
	Sales Projections	
	Projected Cash Flow	
Section 4 -	Conclusions & Summary	31
Section 5 -	Business Financing	32
Section 6 -	Supporting Documentation	33
Section 7 -	Arranging Financing	34

SECTION 1

## Executive Summary

Although this is the first page of the Business Plan it is the last page to be completed. It should not exceed 2 pages. It should include: a paragraph that describes your business or business idea; the highlights of the business plan, including a short summary of the financial projections; and a summary of how it is to be financed.

CLICK THE BOX BELOW TO FILL IN YOUR ANSWER (SAVE YOUR COPY OF THE FILE)

SECTION 2

## Your Vision

This section is a description of your business. It covers areas such as the products you are selling your customers, how you will make your customers want to buy from you, who your competition is, etc. This is where you explain your plans for today, and areas of expansion for tomorrow.

### **BUSINESS BACKGROUND**

Please explain where the idea for this business came from, and why you have decided to pursue it. If this is an existing business, write a short history of your business.

CLICK THE BOX BELOW TO FILL IN YOUR ANSWER (SAVE YOUR COPY OF THE FILE)

## Your Products or Services

A product or service is a good you will sell or a service you will provide. Your business may focus on one type of product or service, or it may offer several different kinds. It is crucial that you have a clear understanding of the different kinds of products you offer (or plan to offer) because this will help you identify who your customers are.

Concentrate on major types of product rather than listing every single item. Consider these examples:

- ◆ A retail jewelry store might have four areas (fine gold jewelry, fashion jewelry, giftware and china/crystal/silverware), or it may focus on one or two of those areas.
- ◆ A carpenter offering a full range of services may have two areas; major jobs (house construction, sun decks, trusses) and basic home renovation/maintenance.
- ◆ A restaurant may also offer catering services to hotels and cater private functions (home & office parties, special events, etc.) – three areas in total.

One reason for listing each of these separately is that each group may have different types of customers with different needs. You may want to promote each area of your business in a different way from the others, since the advertising that reaches one market may not reach others. These groups may also have different mark-ups or gross profit margins associated with them. Listing them separately aids in determining how much inventory will be purchased in the Cash Flow Projection. Different products or services may also have different sales cycles (ie: you may sell more of one product during the summer, and more of another product during the winter). By grouping them separately it makes it easier to project expected sales.

Be sure to provide a brief description of your products or services that will help the reader of your plan better understand your business. Describe what they will or will not do. List all features and benefits for you products, and make special note of any feature that differentiate your products or services from those of the competition.

Include any exhibits such as drawings or photographs of the product to be manufactured, or a description of the services to be offered.

# Your Customers

## Your Market Area

Where do your customers live? Are you appealing to people in your community? Focus on your main market areas.

CLICK THE BOXES BELOW TO FILL IN YOUR ANSWER (SAVE YOUR COPY OF THE FILE)

## Your Customers

Who is buying (or will buy) your products and services and why? Who are your customers? (In the case of consumer goods what is their age range, average income, marital status, average family size, average expenditure, leisure activities, education, etc.) What do they want? How many customers are there in your target market? Why do they buy your type of product – what needs does it fulfill? How do they shop for your product or service? How do they perceive your business and its products and services? How do they perceive your key competitors, and their products and services? How sensitive are they to pricing differences?

The better you can describe your customers the better you will be able to plan how you are going to sell, produce and advertise your product or service.

CLICK THE BOX BELOW TO FILL IN YOUR ANSWER (SAVE YOUR COPY OF THE FILE)

## The Industry

Are there any economic, social, technological or regulatory trends in the industry? Is your market growing, shrinking, or stable? Do you expect any major changes in the demand for your types of products in the near future (within five years)? Focus on the overall demand for your types of products, not the demand for your business. Note that a shrinking market is not necessarily a bad thing, but it does affect how you sell your product or service. It will also affect your long-term strategies relating to your business.

CLICK THE BOX BELOW TO FILL IN YOUR ANSWER (SAVE YOUR COPY OF THE FILE)

## The Competition

One of the main keys to your success will be in establishing a market niche for your business. To do this, you must understand who your competitors are, where their strengths are, and more importantly, where they are weak. Disposable income is limited, and many businesses are competing for it! There is only a limited amount of “spending money”, and many different ways of spending it. Every product has competition of some kind and it is important to know who your competitors are.

When looking at your competition, include direct competitors and substitutes. Substitutes are products that are different from yours, but can compete for your market. For example, an ethnic restaurant may have no direct competition in the community, but would still compete with other firms that cater to the limited “dine-out” market. Pay careful attention to your competitors market “niche”. Are they appealing to certain types of customers? Are they focusing on certain features of their products? Why do people buy from them? This information can give you many ideas how to set your company apart from the crowd, and create your own niche.

In listing your competitors you may wish to group similar competitors together if you have a large number of competitors. For instance, if you are starting a restaurant you may wish to use categories such as drive-through restaurants, family restaurants, and dining lounges.

Identify the strengths and weaknesses of your competition and its products with respect to factors such as location, price points, advertising, staff quality and service. Estimate their percentage of market share.

CLICK THE BOXES BELOW TO FILL IN YOUR ANSWER (SAVE YOUR COPY OF THE FILE)

Competitor Market Share

Strengths

Weaknesses

Competitor Market Share

Strengths

Weaknesses

Competitor

Market Share

Strengths

Weaknesses

What are the strengths of your business and your products, compared with your competitors?

What are the weaknesses of your business and your products, compared with your competitors?

How will you overcome the weaknesses of your business and your products? What are your plans to improve your weak areas? This is a crucial area, and one that should be looked at very closely. It may be linked to your marketing plan, it may involve changes in your product or service, or it may involve changes to how you are operating your business.

## The Marketing Plan

How will you tell your customers about your products and convince them to buy from you? Marketing is more than just advertising. It also includes pricing strategies, and how your product or service will be distributed to the ultimate consumer.

### Promotion Strategy

*“The manufacturer who waits for the world to beat a path to his door is a great optimist. But the manufacturer who shows this mousetrap to the world keeps the smoke coming out of his chimney.” – O.B. Winters*

Your promotion strategy is where you promote your products and your firm, trying to create a perception of value among your customers. This could include areas such as customer service, discounts, special sales, charities/causes your business may support, and advertising.

Keep in mind the timing of your promotions. (An advertising and promotion checklist follows on the next page.) What are the messages you will be sending to your customers? What are you trying to accomplish? Are you creating awareness of your business, are you trying to create an image for your product or service, or are you trying to create sales? What are the costs? Include the strategies you will use (selling methods, the advertising planned, discounts, coupons, etc.)? Include any print advertisements and flyers that are already made up in an appendix.

## Advertising & Promotion Checklist

This list is designed to help you keep track of the costs and timing of your advertising and promotional activities. This list is not all inclusive.

Type	Month	Cost
Radio		
T.V.		
Newspaper		
Magazine		
Flyers		
Coupon/Pak		
Yellow Pages		
Promotional Items (i.e. pens, fridge magnets)		
Business Signage		
Vehicle Signage		
Banners		
Welcome Wagon		
Business Cards		
Internet		
Trade Shows		
Sponsorships		
Charitable Donations		
Networking - Chamber Membership		

## Price

How do you determine your prices? How do your prices compare with those of your competitors? How do your customers perceive your prices?

Keep three things in mind:

- ◆ If your products are **more expensive** than your competitors, why will your customers be willing to pay extra price?
- ◆ If your products are **cheaper** than your competitors, can that affect the way that customers view the value of your products?
- ◆ If your products are **the same price** as your competitors, do you have other plans to set yourself apart from the rest?

## Location & Distribution

Location can be a vital part of your success. It can be crucial for retail sales and consumer services, along with some business-oriented services. Location is not crucial for all firms – a wide range of firms are run from home. Where location is less critical, how the product or service is delivered or distributed to customers often plays a more important role. Distribution channels can also play a very important roll if your business is a manufacturer or a wholesaler.

Where will your business be located? Why? How will your products or services be delivered or distributed to the ultimate consumer?

## The Management Team

Your skills and those of your advisors and key employees will play a vital part in your success or failure. There is far more to running a company than simply providing the goods or service itself. All businesses require skills in organization, sales, customer relations, crisis management, marketing and technical areas. Successful entrepreneurs either have sufficient experience in these areas to be reasonably effective, or have people with those skills who they can draw on.

You will also need to have plans for overcoming your weaknesses. No one is strong in every area. An effective entrepreneur knows where they are weak and has plans for compensating for those weaknesses. You may need to hire staff, take training in some of your weak areas, or arrange with someone to provide those skills (e.g. Bookkeeper, Lawyer, Advertising Rep., etc.)

Outline the roles your management team will play in your business. Discuss their skills and experience in the following areas (remember to include key individuals like your accountant even though they may not be employees or management in the strictest sense):

- ◆ **Technical** – The ability to provide the service or make the goods. What education, certificates and experience does the individual have in this area. Include copies of any trade certificates in an appendix.
- ◆ **Sales** – The background in selling products.
- ◆ **Promotion** – The exposure to using advertising or promoting products.
- ◆ **Organization** – Experience in managing many details at the same time.
- ◆ **Administration** – Experience and education in handling books, tracking cash, etc.

Individual

Individual Position  
Responsibilities  
Skills and Experience as they relate to the business

Individual Position  
Responsibilities  
Skills and Experience as they relate to the business

Are there any skills important to the business not possessed by any of the management team?  
How is your business going to acquire them? **Weaknesses are NOT a sign that you should not consider going into business.** Everyone has weaknesses. However, they are an indication that you should make plans to deal with these weak areas – do not ignore them.

## Business Structure

In this section, you describe your business. Complete this section whether you are planning to start a new business, expand your current business, or purchase an existing business.

### Name

**Address** (If you have not committed to a specific location yet, put down the expected site.)

### Business Structure

- Is this a:
- Proprietorship – a business owned, managed and controlled by one person.
  - Partnership – a business where two or more people share ownership.
  - Limited company – a company that is legally separate from its owners.

### Status

Are you starting a brand new business? Taking over of an existing business? Expanding your current business? Refinancing your existing debts?

## Type of Business

Is this a manufacturing business, a retail store, or a service business? A business may cover several of these areas, such as a manufacturer who sells direct to consumers.

If this is the case for you, check all that apply. However, only check major areas, not those that make up only a small part of your overall business.

Manufacturing

Retail

Service

## Operating Plan

### Facility and Equipment Required

What facilities or equipment do you require to make your product or provide your service? Will you be operating out of your home? If not, where will you be located? Will renovations be necessary?

### Delivery of Products / Supplies

Who are your suppliers? Have you made arrangements for ensuring that your supplies arrive when needed? What sort of terms will they give you?

### Staffing Requirements

What staff and skills will you have to hire? Will you need staff for sales, management, technical or other functions? Will some of the staff be seasonal?

## **Technological Innovations in Your Field**

Are you in a field where technology is rapidly changing? If so, what are the changes, and how can they affect you? If your products or equipment can become outdated quickly, you need to be aware of this and make plans accordingly.

## **Age of Your Equipment**

If you need equipment to make your goods or to provide your service, how old is it? Is it reliable? If it broke down, could it be repaired or replaced quickly? Could changing technology turn your equipment obsolete? Does it look like new regulations might force you to change your equipment, or give advantages to competitors with different machinery? Can your equipment adjust to meet these changes?

## **Not So Minor Details**

Businesses are affected by many regulations, and these cannot be ignored. Items like insurance and administration can be relatively minor details, if they are handled properly. If not, they can consume a great deal of your time (and money).

## Licenses and Permits

*Business License* – Do you have your current license from the local government?

*Name Search/Registration* – Unless your business is a sole proprietorship operating under your own name you must register the business name. Have you done a name search & registered your business name.

*GST* – If you expect revenues of \$30,000 or more it is required, otherwise it is voluntary. Have you registered?

*Revenue Canada* – If you have employees you will require an Employer Registration number. Do you have one?

*WCB* – Do you require a Worker's Compensation Board assessment number? How much will the premiums be?

*Zoning* – What zoning regulations apply to your business? How will you be affected?

Are there any special licenses that are required for your business?

## Insurance

What types of insurance will you need? How much does each type cost?

## Administration

Who will handle your bookkeeping, year-end accounting / taxes, and legal matters?

## SECTION 3

## Your Financial Needs

In the previous section, you covered the vision of your business – the products you will sell, your customers, how you stack up against your competition, the equipment you need, your marketing plan, and so on. Now you can determine how much money you will need to get the business off the ground, and keep it going.

Determining your financial needs involves these areas:

- ◆ Use & Source of Funds – how much money you need, and where you will get it from.
- ◆ Owner's Drawings – calculation of your personal living expenses, and the amount you plan to take out of the business.
- ◆ Sales Forecast: Assumptions – what you base your sales forecasts on.
- ◆ Cash Flow Projection – a 12 month estimate of sales and cash into your business.
- ◆ Financing – information needed to get any loans/investments you require to start the business.

Each of these is covered in detail in the following pages.

## Start-up Costs & Capital (Fund Use and Source)

This section outlines the money that you will need to start your new business or expand your existing business, along with where the money will be coming from. The first part (what you need) is the Use of Funds, while the second (where it comes from) is the Source of Funds.

### Use of Funds

This section should cover whatever you need to start or expand your business, including items you already have. Let's assume your business requires \$10,000 in equipment to operate, and you already have \$3,000. You would show the full picture (\$10,000) in the appropriate section of the Use of Funds, **NOT** just the part that you don't have yet (\$7,000)

The Use of Funds is a summary showing the amount needed in each area. While it shows the complete picture, it is not necessary to put every single item on the sheet – only major items should be listed individually. If you have an itemized list, feel free to attach it to the plan.

The Use of Funds covers the following categories:

- ◆ Capital Items – major pieces of equipment you need to start to expand.
- ◆ Inventory
- ◆ Other costs – advertising/marketing, business licenses, accounting/ bookkeeping fees and other costs related to start-up or expansion.
- ◆ Renovations
- ◆ Operating line – similar to a line of credit, these are funds you need to carry you through slow periods and provide a “buffer” your operation.

Complete only those categories that apply to your business. List the items you are contributing to the business separately from those you will have to buy. Using the same example you would show \$3,000 in owned equipment and \$7,000 in equipment to be purchased/leased, rather than a \$10,000 total.

### Source of Funds

Once you know what your needs are, you need to determine where the money will come from. List the cash and assets that you are contributing to the start-up or expansion. Show the full amount of any leases, bank loans, investments by partners or other investors, and the like.

**Start-Up Costs (Use and Source of Funds)**

<b>Use of Funds</b>	
<i>Capital Items:</i>	\$
	\$
	\$
	\$
	\$
<i>Inventory:</i>	\$
	\$
	\$
<i>Other Costs:</i>	\$

<i>Assets</i>	\$
<i>Other (specify)</i>	\$
<b>TOTAL SOURCE OF FUNDS</b>	\$

**Total Source of Funds:**

**Less Total Use of Funds:**

**Starting Cash Balance for Month 1:** *(Can not be negative)*

**Personal Requirements**

In this section, you calculate the funds you need to meet your personal living expenses. The numbers generated in this section will become part of your projected cash flow.

There are two types of expenses you must consider: Monthly and Periodic. In the Owner's Drawings section on the next page, list both types on the sheet provided. Also list any other sources of income for you, such as spousal income.

The amount in this section is the **LEAST** you can take from the business. The least you can take from the business for each month is the sum of the Minimum Monthly Owner's Draw Required, and any periodic expenses that will be due in that month. You can take more than this, but you cannot take less.

For example, your minimum monthly living expenses may be \$1,900. You could not take less out of the business to live on, though you certainly could choose to take more (e.g. \$2,500 per month).

## Owner's Drawings

### Monthly Expenses

# Sales Projections

## Sales Assumptions

Sales forecasts must be supported to be credible. If your projections are based on your many years experience in the field, say so. In the case of an existing business, past sales figures may also be used, but if the forecast varies substantially, or if the business is new to you additional support is beneficial. However, the more information you can provide to show how you came up with your sales forecast, the more accurate (and meaningful) they will be.

The assumptions should consider any major areas that can affect your business. For example, a retail store should consider the effects of Christmas on their November and December sales.

Factors could include things like:

- ◆ Seasonal conditions – weather, Christmas, etc.
- ◆ Economic conditions – logging down-time, housing constructions, etc.
- ◆ Customers – the number of customers you expect to be working with on a daily, weekly, or monthly basis.
- ◆ Marketing – the type of marketing or promotion you will be doing during this time, and the number of hours you plan to devote to it.

What are your sales assumptions, and where did you get the information to support them.

### Unit Sales Projections by Product and Month

In the first column write the month which corresponds to the month listed. Enter the quantity of each product or service you expect to sell during the month. Enter the unit of sales (ie. hour day, each, case) for each category of product or service in the row labeled "Unit of Sales".

Estimate sales for each general type of product that you plan to offer, by month. For example, a jewelry business may plan to offer products in four areas – gold jewelry; fashion jewelry; gifts; and china & silver. The entrepreneur would make sales forecasts for each of the four areas product groups, **NOT** for every single item that the store carries.

Remember, "Month 1" is the first month of business for which this plan applies, and month 2 is your second month of business, etc. Month 1 is not necessarily January.

Month		Product 1	Product 2	Product 3	Product 4
	<b>Unit of Sales</b>				
	<b>Month 1</b>				
	<b>Month 2</b>				
	<b>Month 3</b>				
	<b>Month 4</b>				
	<b>Month 5</b>				
	<b>Month 6</b>				
	<b>Month 7</b>				
	<b>Month 8</b>				
	<b>Month 9</b>				
	<b>Month 10</b>				
	<b>Month 11</b>				
	<b>Month 12</b>				

### Sales Dollars projected by Product and Month

In the first column write the month which corresponds to the month listed. In the row labeled "Price/unit" write the price you will be charging for each unit of product or service.

For each type of product or service, multiply the number of units you expect to sell (preceding page) by the selling price. Total each row.

		Product 1	Product 2	Product 3	Product 4	Total *
	Month 1					
	Month 2					
	Month 3					
	Month 4					
	Month 5					
	Month 6					
	Month 7					
	Month 8					
	Month 9					
	Month 10					
	Month 11					
	Month 12					

*\*Used on next page*

### Projected Cash Inflows By Month

If you offer credit some of the money from your sales will be collected in later months. What percentage of sales are collected in the month they are made or in subsequent months?

Current Month	%
Second Month	%
Third Month	%
Fourth Month	%
Total	100%

Cash Sales refers to sales where the cash is collected in the month of the sale. Accounts Receivable refers to sales where the cash is collected in months subsequent to the sale.

		Total Sales (from previous page)	Cash Sales*	Cash Collected from Accounts Receivable**
	Month 1			
	Month 2			
	Month 3			
	Month 4			
	Month 5			
	Month 6			
	Month 7			
	Month 8			
	Month 9			
	Month 10			
	Month 11			
	Month 12			

\* These numbers are used in Cash Flow as cash sales

\*\* These numbers are used in Cash Flow as Accounts Receivable

## Expense Assumptions

### Material Cost:

*Labour:* (How many employees, what are the wage rates and contract terms):

*Administrative & Financial Expenses:* (Does your interest reflect the proposed debt? Do your bank charges and accounting fees reflect expectations?):

*Other:*

### Critical Risks

What sort of things could severely affect your sales or your expenses. These may be things like a new competitor entering the market place, a change in regulations, or a key supplier going out of business.

## Projected Cash Flow – Instructions

***The Projected Cash Flow Sheet can be found as a separate downloadable document on the website.***

The key to remember in preparing a cash flow is that you are not trying to determine a profit or loss yet – you are trying to predict the timing of cash in or out of your bank. ***Don't spread costs evenly over the year.*** For example, if insurance costs \$1,200 per year and is payable in May, put the whole \$1,200 in that month. Do not put in \$100 each month. ***Take the time to do it right.*** Most of the data collected here is also used on balance sheet and income statement forecasts. ***Review the expenses*** you enter to be sure you have remembered everything. Items discussed in the visioning section nearly always result in some sort of cash flow. If you need guidance while completing this form, contact your local Community Futures office.

### Cash In

Use the sales forecasts you did in the last section to estimate cash into your business. Don't forget any credit terms you may provide – if you agree to payment in 30 days, a sale in January will show up as cash to you in February, under the line "Accounts Receivable".

### Cash Out

Several categories of expenses are listed. Do not be afraid to add others or ignore those that do not apply. Do not be afraid to provide an itemized list of items included in these and other categories with your business plan.

*Advertising/Marketing* – These are your costs for advertising, promotion, and so on.

*Direct Labour* – These are Labour costs which vary directly with the cost of producing your goods and service. For instance if an employee is paid per unit manufactured. It should also include employee deductions like Staff Wages/Labour.

*Staff Wages/Labour* – This should reflect the number of employees, including wage rates. Also include employee deductions that you are responsible for (UIC, CPP, WCB, Vacation Pay, etc.) As a general rule of thumb, these items usually amount to at least 10% of the wage costs.

*Borrowing Costs* – The cost to repay any loans that your business may require. This includes loan payments from banks and other lending institutions.

*Starting Cash Balance* – The Starting Cash Balance is the Ending Balance for the preceding month. In month one it is cash left from the business in the preceding month (provide a forecast in the appendices) in the case of an existing business.

SECTION 4

## Conclusions and Summary

Include the following points in your discussion: the approach in starting the new organization, the capital required and any safety factors used, what levels of profit are expected and what is the time schedule for starting this operation. If you have any general comments, add them into this section too.

SECTION 5

## Business Financing

What are you and your partners or shareholders contributing to this venture in cash?

What are you contributing to this venture in Assets? (Give the current market value of these assets, not the price you paid for them). If there is money owed on these assets, state how much is owing.

How much money do you wish to borrow?

Please make an itemized list of what the money to be borrowed is to be used for.

## SECTION 6

## Supporting Documentation

The following provides a list of the supporting documentation that is required (as applicable) to support your Business Plan and/or your request for funding:

- Resumes of key people
- Data supporting ability to meet sales goals
- Price schedule for product line or service
- Market survey data
- Drawings
- Agreements
- Articles/publicity/previous advertisements
- Letters of Support
- Letters of Intent
- Past financial statements (if available)
- Journeyman tickets or other certificates of importance
- A copy of your loan proposal
- Offers to purchase
- Quotes
- Tax assessments and/or appraisals for property
- Any other items of importance to your business

## SECTION 7

## Arranging Financing

By this point you will know whether your business will require financing. If you need to borrow money, the information in the business plan will help you greatly in arranging financing. Some lenders may only require a synopsis of the plan, others will want to see the entire plan.

In addition to a business plan a lender will want to see some sort of loan proposal that states:

- How much money you wish to borrow.
- What you are going to buy with that money (include quotes).
- What you are going to use as collateral for the loan.
- The current value of assets being used as security.
- A statement of your net worth.
