Bring your laptop (if possible) and join CARA for a day of hands-on training using Cowbytes beef ration balancing program. We will be going through step-by-step instructions of the computer-based cattle ration tool.

You are encouraged (but not required) to bring your own feed analysis information so you can build a formulation based on your herd and your feed. CARA can send your feed samples to the lab for testing.

Cowbytes program is available online or at the workshop for \$50, please let us know ahead of time if you require the program at the workshop.

If you do not have a laptop, please notify the CARA staff when you register.

Cost: FREE
